§ 95-126. Short title and legislative purpose.

(a) This Article shall be known as the "Occupational Safety and Health Act of North Carolina" and also may be referred to by abbreviations as "OSHANC."

- (2) The General Assembly of North Carolina declares it to be its purpose and policy through the exercise of its powers to ensure so far as possible every working man and woman in the State of North Carolina safe and healthful working conditions and to preserve our human resources:

 - b. By providing that employers and employees have separate but dependent responsibilities and rights with respect to achieving safe and healthful working conditions;
 - c. By authorizing the Commissioner to develop occupational safety and health standards applicable to business giving consideration to the needs of employers and employees and to adopt standards promulgated from time to time by the Secretary of Labor under the Occupational Safety and Health Act of 1970, and by creating a safety and health review commission for carrying out adjudicatory functions under this Article;
 - d. By building upon advances already made through employer and employee initiative for providing safe and healthful working conditions;
 - e. By providing occupational health criteria which will assure insofar as practicable that no employee will suffer diminished health, functional capacity, or life expectancy as a result of his work experience;
 - f. By providing for training programs to increase the number and competence of personnel engaged in the field of occupational safety and health;
 - g. By providing an effective enforcement program which shall include a prohibition against giving advance notice of an inspection and sanctions for any individual violating this prohibition;
 - h. By providing for appropriate reporting procedures with respect to occupational safety and health which procedures will help achieve the objectives of this Article and accurately describe the nature of the occupational safety and health problem;

- i. By encouraging joint employer-employee efforts to reduce injuries and diseases arising out of employment;
- j. By providing for research in the field of occupational safety and health, by developing innovative methods, techniques, and approaches for dealing with occupational safety and health problems;
- k. By exploring ways to discover latent diseases, establishing causal connections between diseases and work in environmental conditions, and conducting other research relating to health problems, in recognition of the fact that occupational health standards present problems often different from those involved in occupational safety;
- l.
